data compiled and provided by IDFL Laboratory and Institute

The purpose of this document is to assist manufacturers, suppliers, and/or buyers in meeting the standards specified by QB/T 1194-2023. It is specifically designed to help meet the various quality requirements for the following:

1. Meeting Down and Feather Requirements for QB/T 1194-2023
2. Meeting Fabric and Textile Requirements for QB/T 1194-2023
3. Meeting Finished Product Appearance and Labelling Requirements for QB/T 1194-2023

## Prefix: About QB/T 1194-2023:

QB/T 1194-2023 is an amendment QB/T 1194-2012. This standard specifies the terms and definitions, requirements, test methods, inspection rules as well as the labelling, packing, transportation, and storage of down & feather mattresses. It is applicable to mattresses made with various textile fabrics that are filled with down and feathers, or mattresses containing down and feathers with other materials that are distributed in different layers or zones.

## 1. Meeting Down and Feather Requirements for QB/T 1194-2023:

Down and Feather components are tested using the GB/T 10288-2016 methods and evaluated according to GB/T 10288-2016 requirements (see chart 1).

### Additional Details:

Content:

- Components must meet minimum requirements given by GB/T 17685-2016 (see chart 1).
- For products containing both down and feather and other materials, the mass percentage of down and feather should be at least 50% of the total filling weight and the down components must also meet minimum requirements given by GB/T 17685-2016 (see chart 1).

Goose or Duck Species:

- Goose down labeled as 80% or greater requires species testing **only** on down.
- Goose down labeled as less than 80% requires species testing for both down **and** feather.
- Unidentified down and feather are reclassified according to the known percentage ratio of duck and down. Goose products must contain a minimum of 85% Goose (see chart 1).

Fill Power:

- Fill Power is tested according to GB/T 10288-2016 steam method. Fill Power must meet minimum requirements given by GB/T 17685-2016 (see chart 1).
